

Amana

Family Care With Pure Air™

2011 Home Comfort Portfolio

The ONLY Room Air Conditioner Healthcare Brand with UV-Air Purifier Technology

EnergySaver® Portable Air Conditioners , EnergyStar® Dehumidifiers

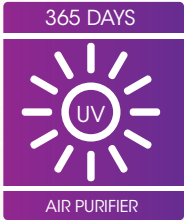

Amana room air conditioner and dehumidifier products are designed to enhance your family's home comfort while saving you money on monthly utility bills. Amana's ENERGY STAR® room air conditioners represent the ultimate in efficiency, using energy efficient components and coolants that ensure years of comfort for your family, and the family budget. Home owners that purchase Amana ENERGY STAR® room air conditioners may also enjoy the benefit of a state or federal rebate for purchasing an ENERGY STAR® product.

Visit www.energystar.gov to determine if your state offers ENERGY STAR® rebates.

Amana room air conditioners use new eco-friendly coolants that cool your air more efficiently, and are zero ozone depleting. This means Amana products protect the earth's atmosphere for future generations. In addition, our room air conditioning, portable air conditioning, and dehumidifier products are all RoHs compliant, an important new certification that ensures that our products are lead and mercury free. This is particularly important for preventing heavy metal leakage into landfills and water tables in your state.

AHAM Certified Products Confirm Major and Portable Appliance Claims

UV Air Purifier Lessens Microbial Growth that Cause Germs and Bacteria in the Air. Cleaner Air Means a Healthier Family

ENERGY STAR® Rated Products Minimize Greenhouse Gas Emissions and Reduce Energy Bills

RoHS Compliant Product Protects the Environment

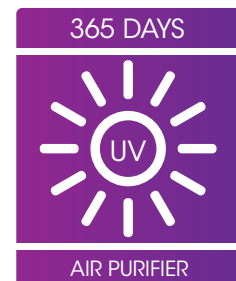

Eco-Friendly R410a Coolant Protects the Environment

Remote control has braille text below buttons for sight impaired

ONLY AMANA AIR CONDITIONERS
PURIFY YOUR HOME'S AIR

Amana is the only room air conditioner brand with a built-in air purifier that reduces dust, pollen, germs, and odors, making it easier for your family to breathe during allergy season and throughout the year.

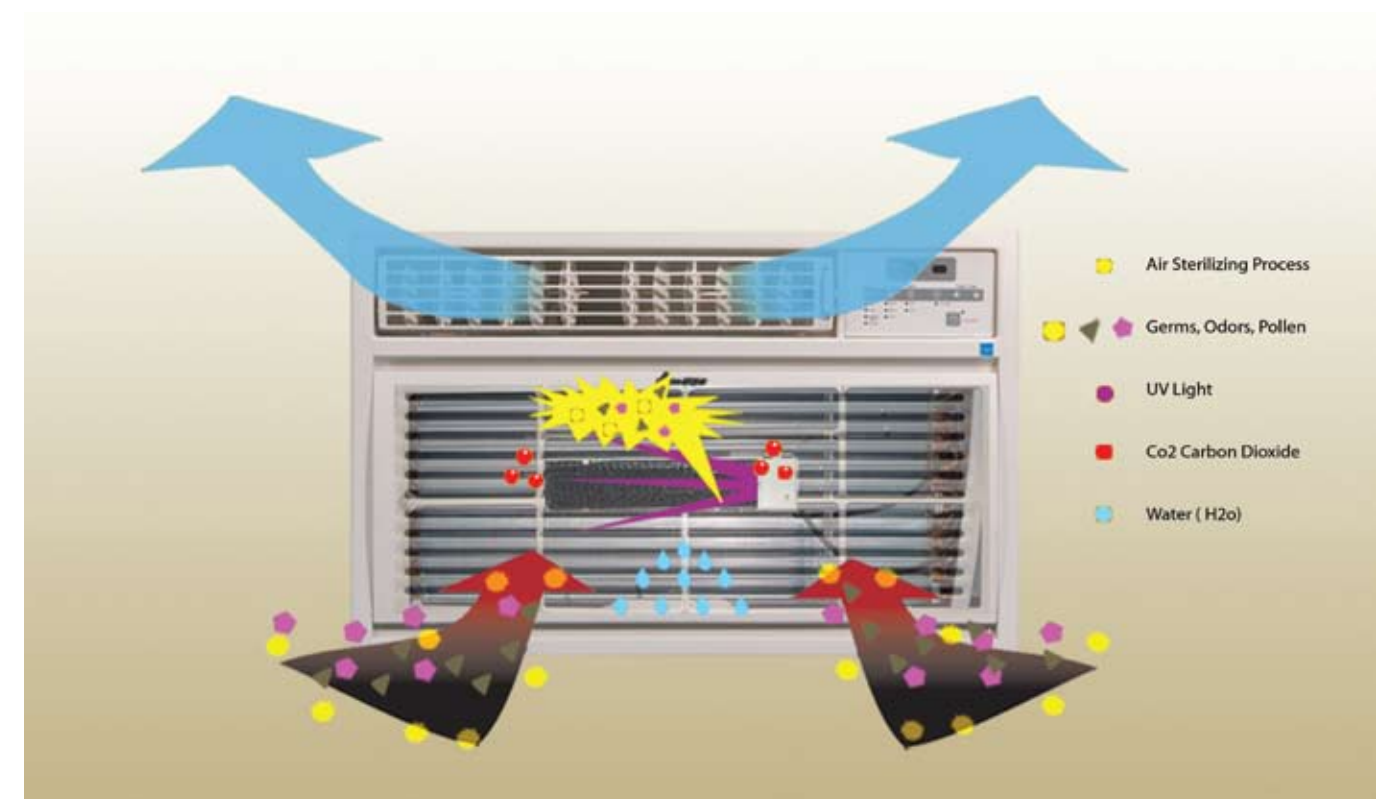

Amana products feature 3 in one comfort.

HOW IT WORKS:

- Air is purified and deodorized by sunlight-like process.
- Unique photo catalytic air purifier with safe UV light
- UV light activates titanium dioxide (TiO₂) filter material
- Active TiO₂ filter converts pollutants to carbon dioxide and water

In order to maintain optimum air purifying performance, Amana suggests consumers replace filter Part #AC5200-281 every 12 months. The UV-Air Purifier Filter can be purchased at their Amana dealer.

AMANA OFFERS CONVENIENT
MAGNASTORE™ REMOTE CONTROL
WITH BARRIER FREE BRAILLE TEXT

MagnaStore™ Remote:
Amana air conditioning products feature the exclusive MagnaStore™ remote control that allows consumers to conveniently store their remote on the side of their air conditioning unit. Simply placing the remote against the unit secures the remote magnetically.

Braille Text:
There are over 20 million sight impaired people in North America. Amana is one of the first brands to offer a remote control with Braille text. The MagnaStore™ remote features very subtle raised braille text, offering a barrier free tactile user experience for the sight impaired.

ENERGY SAVER

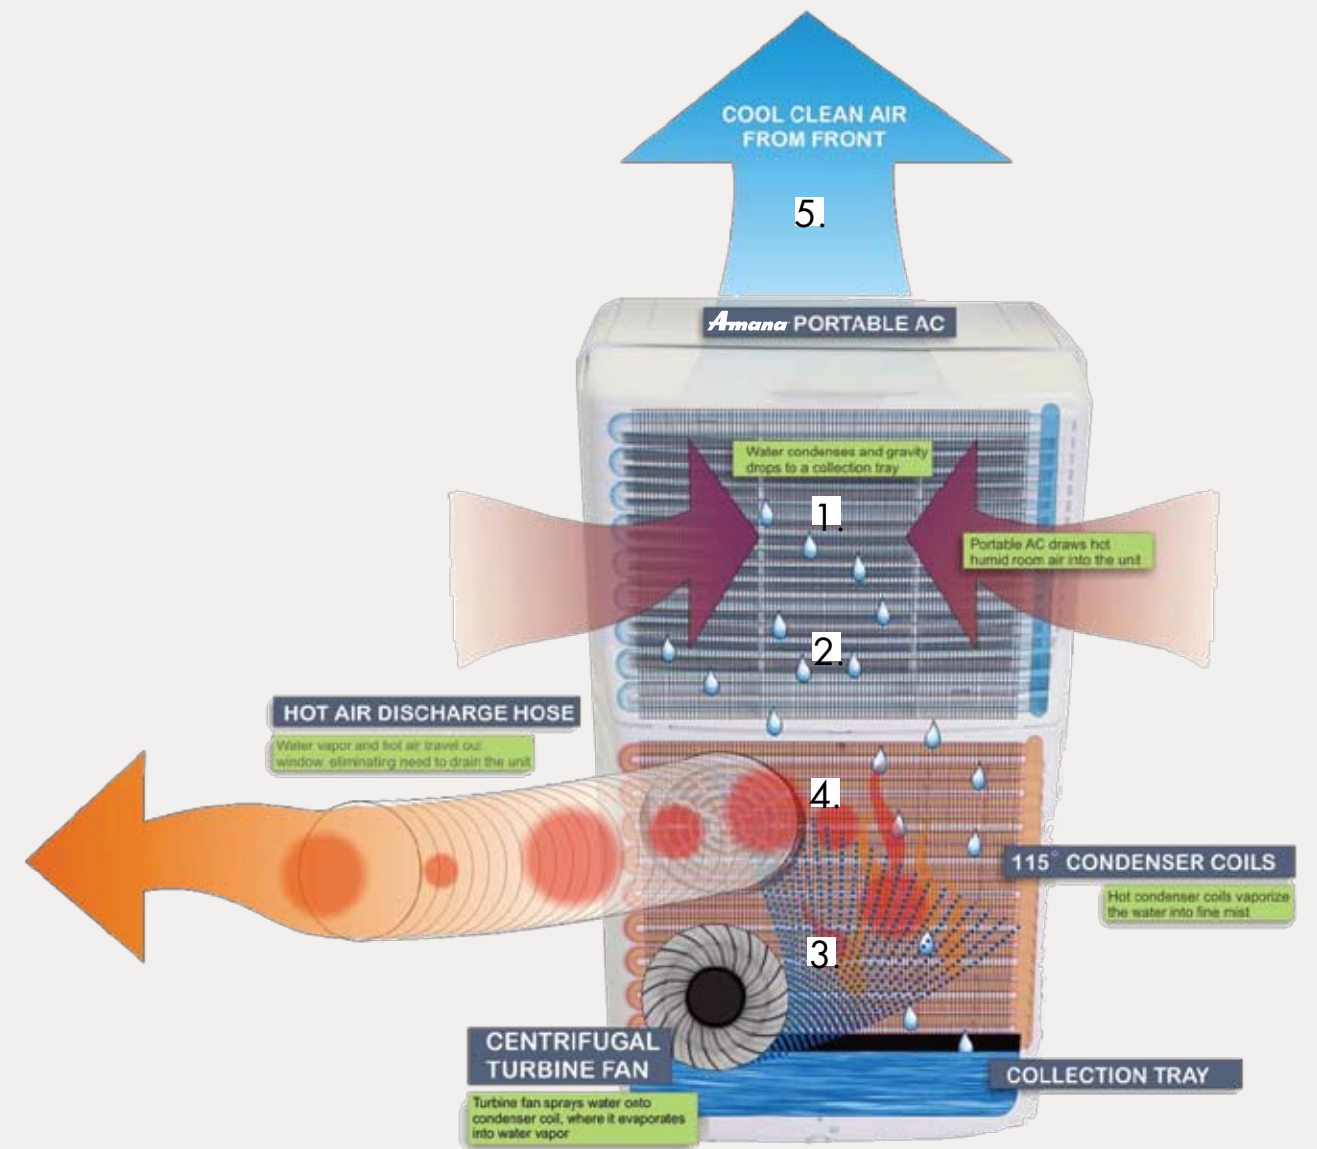

\$\$\$

ZONE COOLING

AMANA PORTABLE AIR
CONDITIONERS ARE
IDEAL FOR REDUCING
ENERGY BILLS.

Home owners can now cool only the room that is inhabited, rather than cooling their whole home. This localized cooling offers real energy savings, and is eco-friendly by reducing unnecessary and costly consumption of electricity. The easy-to-move Amana portable air conditioners can also be rolled from room-to-room via high quality castors.

PATENTED AUTO-EVAPORATION TECHNOLOGY ELIMINATES THE NEED TO EMPTY WATER TRAY

How Does It Work?

1. Warm humid air is drawn into portable ac in back.
2. Humidity is pulled from the air, and drops as water from the coils to water collection tray.
3. A turbine fan sweeps the collected water up onto the hot condenser coils, where it evaporates into a water vapor.
4. The water vapor is sucked out the rear hot air discharge hose, and passes out the homeowners window, where it simply drifts away.
5. Cool air is discharged into the homeowners room interiors.

D974E UPC: 6-88057-34862-9

Unit Dimensions (WxDxH): 15" x 12" x 23-1/4"
Carton Dimensions (WxDxH): 16-9/16" x 14" x 25-7/8"
Electrical (volts, amps, watts): 115V, 7.5A, 820W
Unit Weight: 41.0 lbs.
Shipping Weight: 47.6 lbs.
Container Quantity: 710

Family Care With Pure Air™

Experience the only air conditioner brand with healthcare air purification technology.

Amana ENERGY STAR® room air conditioners remove pollen, dust, and odors from your home environment.

Amana® Healthcare Air Purifier Technology has been tested by 3rd party test labs according to ANSI/AHAM standards, for effectively purifying the air your family breathes.

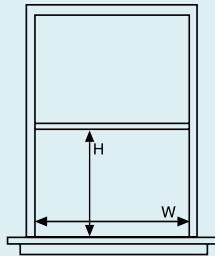

Choosing a Proper Room Air Conditioner

Measure:

Measure the height and width of the window opening, and make sure the dimensions on the AC packaging fit the window.

Check:

Check out the nearby outlet and make sure to match the unit to that outlet.

115 volt
15 Amp

230/208 volt
15 Amp

230/208 volt
20 Amp

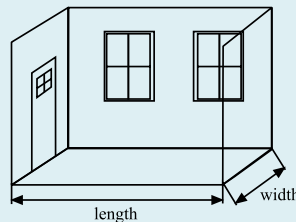

230/208 volt
30 Amp

Calculate:

To calculate the area of the room to be cooled, multiply of the length of the room by its width to determine square footage.

Match:

Use the below chart to determine the proper room air conditioner size. (Second floor rooms, kitchens and other locations may require more BTUs.)

BTUs	Sq.Ft.	Sq.M
5,000	100-150	9-14
6,000	151-250	14-23
8,000	251-350	23-33
10,000	351-450	33-42
12,000	451-550	42-51
15,000	551-700	51-65
18,000	701-1,000	65-93
24,000	1,001-1,500	93-139

Special Considerations:

- Heavily shaded room: reduce capacity by 10%
- Kitchen to be cooled: add 4,000 BTUs
- Room above a ceiling: add 2,000 BTUs
- More than 2 people in a room: add 600 BTUs per person

Choosing a Proper Dehumidifier

Measure:

Measure the area in square feet that needs to be dehumidified. Then determine the moisture condition of the space.

Dehumidifier Selection:

Select the right size dehumidifier with the chart below.

Selection Guide:

CHOOSING THE RIGHT DEHUMIDIFIER

- ➔ When constructed properly and with correct ventilation, basements should ideally be dry. But somehow most basements end up becoming a victim to dampness.
- ➔ PINT capacity on dehumidifiers determines how many pints of water the unit will take out of the air in a 24 HOUR period.
- ➔ Use the chart below to identify the moisture level in your room and to estimate the Pint capacity you need.

Damp Space feels damp and has musty odor only in humid weather

Very Damp Space always feels damp and has musty odor. Damp spots show on walls and floor

Wet Space feels and smells wet. Walls or floors sweat, or seepage is present

Damp	30Pints	BASEMENT / SOTANO	Wet	65Pints
Very Damp	45Pints		Very Wet	74Pints
